Due to changes in internet search engines, network changes, policies and terms being modified by others. We have made some changes in the field of communication, graphic / image display, photography and network changes are currently in progress. Slide-in text Marquee has been added to the home page and to the TLG UPDATES Page that contains Additional Holiday Information of closure of office.

Over the last few months we been testing in new private window setting , Private Browsing with Tracking Protection, testing image visibility and website content. Friendly advise to Legal International Services, advisement of financial assistance. Before you frown on security factors of browsers you should check your own that you highly recommend others to use , like your own website (s) you use on a general base. Ratings from us, disgraceful.

We are still currently experimenting with coding formatting from others as far as graphic / image goes. In our own words and testing facts over the years formula (://static) it never worked that well then and it does not work well today. Maybe the formula : (://graphics or images) should be used. In other words we are doing our best to avoid formula (://static).
