**Overview Standing Ground  
Globally Oriented Advertising**

We spent a lot of time browsing our website to make sure the public can see the security lock of the entire website's URL browser. To do this we had to go through a process of elimination proceedings.

If your website does not have a secure lock in the URL browser try placing an ( s ) in front of all ( P's ) HTTP:// = looks like this ( https:// ). Upload page to activation. If this doesn't work, re-check all HTTP and make sure there is an (s) in front of the "p", then reload to check again. If you have widgets ? If still no results start pulling all widgets one by one then upload page without the widget, to check result's.

One URL browser was not functioning properly, a new URL was created "Concern Oneself".

The site navigation bar that read TLG Updates, now reads "TLG Overview."

All website pages should be refreshed automatically.

We had some unexpected maintenance down time. May 21,2019 from 4:00 pm through May 22,2019 10 am. and again from 2:30 until 4:30 pm May 22, 2019.

New billing invoices, disclaimer acceptance record has been updated. Business logo has been improved to justify proper location and proper contact compliance.

The e404 redirect responder has been updated. This is what will display when a website, content landing page goes off line due to maintenance, etc.
